EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 17 has been amended to indicate that the apparatus includes more than a storage medium and code segments (that is, to also include the hardware or means for required to provide the functionality) and claim 28 has been amended to specify a computer readable medium comprising the workflow model to circumvent possible 101 problems.

16

17. (Currently Amended) An apparatus comprising a storage medium having instructions stored thereon, the [instructions] apparatus including: means for executing a first code segment for grouping a task subset from a plurality of tasks comprising a workflow; means for executing a second code segment for expressing actual tasks within the task subset as first vertices within a first matrix, wherein values of the first vertices within the first matrix are determined by actual dependencies between the tasks within the task subset; means for executing a third code segment for constructing a virtual workflow including a first virtual task; means for executing a fourth code segment for expressing the first virtual task within the virtual workflow as second vertices within a second matrix, wherein values of the second vertices within the second matrix are

Art Unit: 2193

determined by virtual dependencies between the virtual tasks within the virtual workflow; and means for executing a fifth code segment for associating the task subset with the first virtual task by requiring that completion of the task subset corresponds to completion of the first virtual task.

26

28. (Currently Amended) A storage medium comprising a [A] workflow model comprising: a workflow comprising a first task and a second task, the first and second tasks expressed as first vertices within a first matrix having values determined by actual dependencies between the first and second tasks; a workflow view corresponding to the workflow and comprising a first virtual task expressed as a second vertex within a second matrix having values determined by virtual dependencies between virtual tasks within the workflow view; a first dependency between a first execution of the first task and a virtual execution of the first virtual task; and a second dependency between a second execution of the second task and the virtual execution of the first virtual task.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: the closest prior art reference of record is the reference to Aissi (cited in the previous action); however, the reference fails to teach or suggest the features of the actual tasks within the first plurality of tasks being expressed as first vertices within a first matrix having values determined by actual dependencies between the tasks within the first plurality of tasks, and virtual tasks with the abstracted/virtual workflow expressed as a second

vertices within a second matrix having values determined by virtual dependencies between the virtual tasks within the abstracted/virtual workflow.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Chavis whose telephone number is (571) 272-3720. The examiner can normally be reached on M-F, 9:00am-5:30pm, EST.
